

nlc insurance extended warranty

Our extended warranty provides the following features and benefits:

Name	Feature	Benefit
extended cover on mechanical and electrical components	This extended cover is similar to what the manufacturer covered when the car was new; except for the expendable items such as service items, body hardware, sat nav and stereo system. <small>(Refer to our PDS for more detail.)</small>	You can drive your car having confidence that the mechanical and electrical components of the car are covered for the life of the lease, which may be long after the initial manufacturer warranty expires.
claim repairs up to market value of the car	Claim repairs valued up to the market value of the car.	The insurer will pay to repair your car up to its current market value.
car is covered up to 200,000 kms	Cover up until the car has travelled 200,000 kilometres from new.	This warranty can reduce unforeseen costs as the car ages and travels more kilometres.
choice of repairer	You choose who repairs your car.	You don't have to repair the car where you bought it.
service convenience	Your choice of service agent, as long as they are a licensed and registered mechanic.	You don't have to have the car serviced at the dealer; take it to where it is most convenient for you.
extended cover stays with the car	The warranty is transferable if sold privately.	A warranty can increase the resale value of the car.
only one payment	Once off premium.	Once it's paid you're sorted.
green claim process	We provide a paperless claims process.	As the Insurance Company pays the repairer direct there is no need for you to fill in any paper work.
additional benefits	Free additional benefits package valued up to \$350.	Enjoy \$100 towards towing, \$150 towards transport and \$100 towards trip interruption.
